

CLUVAIRE IS THE WAY TO DELIVER CLEAN AIR TO HEALTHCARE FACILITIES

Helping You Achieve Healthy Building Status

Cleaner Air For All

“And the single biggest structural change that we can make as a society is to do for indoor air quality what we’ve done for water quality. We need healthy buildings because we need healthy communities.”

-Ashish Jha, MD,

White House COVID-19 Response Coordinator

Safe Air System for Healthcare and Other Large Facilities

Infection Control Our UVC active air disinfection units provide a proactive and powerful solution to help your hospital maintain the highest standards of infection control, creating a safer environment for everyone within your facility.

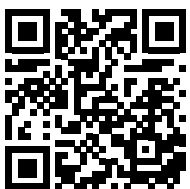

Reduction in Healthcare - Associated Infections (HAIs) Imagine the positive impact on patient outcomes and your hospital's bottom line as our UVC units significantly reduce HAIs, leading to shorter hospital stays, lower treatment costs, and ultimately, a healthier patient population.

Protecting Vulnerable Patients Our advanced UVC technology provides an extra layer of protection, specifically benefiting your most vulnerable patients. By reducing the risk of infections, you're giving them the best chance at a safe and comfortable recovery.

Staff Safety Your dedicated healthcare professionals deserve the best protection. Our UVC units minimize their exposure to pathogens, allowing them to focus on providing top-quality care without compromising their own health.

Enhancing Reputation As a hospital known for its dedication to patient safety and superior care, implementing UVC technology reinforces your reputation as a healthcare leader. Patients and referring physicians will appreciate your commitment to the highest standards.

Long-Term Partnership By choosing our UVC active air disinfection units, you're not just making a one-time purchase; you're entering into a long-term partnership focused on your hospital's safety, success, and continuous advancement in infection control.
